## WELCOME to OLDE TOWNE PORTSMOUTH!

We love boaters and we're glad you're here! Olde Towne Portsmouth is an historic seaport conveniently located at Mile Marker Zero of the Intracoastal Waterway *and* we have the deepest natural harbor anywhere.

This is the %unofficial+Boaters\$ Guide for our great neighborhood, Olde Towne. %unofficial+since any descriptions may be colored by our personal opinions as business owners and residents of Olde Towne . this is not an official publication of the City of Portsmouth. We have worked hard to provide information specifically useful to boaters and to do so as accurately as possible.

If there is a piece of info we have overlooked, let us know! The %unofficial Boaters\$ Guide+is printed in small batches so we can update it regularly with all the latest information. Write us at skipjacknauticalwares@gmail.com.

Welcome!

– *the gang at Skipjack Nautical Wares*  
(One High Street next to High Street Landing and the Lighthouse Lens, facing the river!)

## PLACES TO PARK YOUR BOAT

State law (no pump-out facility or electricity) prohibits Portsmouth from making its public landings (**High Street Landing and North Landing**) officially available to overnight stays. But the landings are perfect for tying up and enjoying the many great shops, restaurants and attractions in town.

*Please note: The landings are adjacent to our residential areas and guests are asked to refrain from airing their laundry – dirty or otherwise (!) – while at the landings.*

A few boaters have mentioned noise levels at the two landings. First, the HRT Ferry runs every 30 minutes from Norfolk, VA to both Portsmouth landings. Expect a steam whistle to blow as the ferry backs out into the river. The ferry runs from early morning to late evening each day. Olde Towne is also directly across the river from dry docks and shipyards, which also from time to time get noisy going about their business. *In general*, Olde Towne is a quiet place and if sometimes the ferry or shipyards produce noise, they also add significantly to our unique ambience!

Occasionally this area is subject to extreme high tides thanks to weather or phases of the moon. Expect water over the dock in the North and High Street basins, mostly a problem during north-northeasterly fronts which bring in higher tide waters into the tributaries along the Chesapeake Bay. These are fixed . not floating . docks.

As in most cities, it is best to make sure that you lock your boat up if left unattended. Theft on visiting boats is very rare, but better be safe than sorry.

**Nota bene:** There is **NO DOCKING** at either landing during 2 event weekends: Cock Island Race (June 15-16, 2012) and the Great Chesapeake Bay Schooner Race (October 12-14, 2012).

A few boaters have mentioned that there is electricity at the High Street Landing basin. True, there is electricity up away from the docks, but it is for CITY USE ONLY! Please do not plug into these circuits. ***We certainly do not want to create friction with the city by abusing the free docking at the landings.***

**Swimming Point** aka **Hospital Point**- Open river anchorage. Moor inside the yellow buoys as there is heavy commercial traffic on the Elizabeth River. The best and maybe only open water anchorage in the area. Everyone leaves around 7:30 AM when southbound to make the lock openings. For Norfolk/Portsmouth events (HarborFest in June or the 4th of July) the anchorage is well defined with buoys and heavily patrolled with a water taxi available. Current protection is good inside the yellow buoy, not so good outside. Some complain about the noise (mostly from Norfolk's Town Point weekend events) and commercial traffic, but most haven't found it an issue at all.

We also have 2 great marinas on each side of downtown: **Tidewater Yacht Marina** and **Ocean Marine Yacht Center**, both of which have transient slips (see [Marinas](#) for more info).
